A551

**Annual Report** **1971**  
**Statistical Supplement**

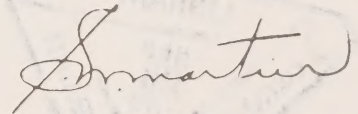

## FOREWORD

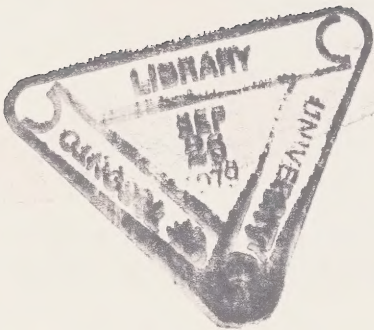

This Supplement provides detailed information about each hospital and the cost of providing necessary services to insured and uninsured patients during 1971.

Under the terms of the Federal-Provincial Agreement each hospital completes an Annual Return which is the source for much of the data shown in this Supplement. One exception is the morbidity and surgical procedure data which are obtained from the admission-discharge forms processed by the Commission during the report year. In order to interpret each table correctly reference should be made to the text and any footnotes appearing at the end of each table; otherwise the information contained in the tables may be misinterpreted or misunderstood.

The combined efforts of the hospitals and the Commission staff which were required to produce this Supplement are greatly appreciated.

A handwritten signature in dark ink, appearing to read "S. W. Martin". The signature is fluid and cursive, with a large initial "S" and a long, sweeping underline.

S. W. Martin, F.C.I.S., F.A.C.H.A.,  
Chairman and General Manager.

# SUMMARIES OF HOSPITAL STATISTICS-1971

## A. INTRODUCTION

The Statistical Supplement provides a factual description of the types of services offered by hospitals and related facilities in Ontario to patients, and the resultant cost under the Plan. A profile of these services and costs can be found in the next few pages under Tables A to L, and the more detailed picture in the twenty-three tables that follow.

The 23 statistical tables have not been type-set this year. By photographing computer print-outs or typewritten tables, and following a process of reduction, economies have been achieved without having to reduce the number of tables. Certain programming difficulties however have resulted in blank spaces instead of dots or a symbol where data are not available or calculations are meaningless. Also space limitations have made it necessary to abbreviate certain hospital names but they are easily interpreted.

Public hospitals are listed in Tables 1 to 5, 9, and 17 to 22 in descending order according to bed size within each group classification. Data referring to a particular public hospital can be found by reference to the alphabetical index on pages 127 to 130. Instructions on how to use the index appear on page 126.

Listed separately, with statistical data only, are private hospitals (Tables 10 and 11), Federal hospitals (Table 12), and nursing homes temporarily approved for chronic care (Table 13).

The morbidity data shown on Tables 14 to 16 are the only data within Tables 1 to 22 not derived from the Annual Returns. These data were obtained from the admission-discharge forms which were processed and tabulated in 1971. These forms also provided the information on surgical procedures shown on Table 23 which is new this year; the pick-up has been limited to one procedure only when surgery has been performed during a hospital stay.

Data for tuberculosis sanatoria, Ontario hospitals for the mentally-ill, or private hospitals for the mentally-ill or retarded are not shown in this Supplement.

## B. FACILITIES AND SERVICES

### Hospital Accommodation in Ontario

It can be seen in Table A that the total beds available at the end of 1971 numbered 50,892 in all hospitals under the Plan. This represented a gain of 1.4 percent or an absolute increase of 703 beds from the end of 1970.

TABLE A

Type of Bed	Total Rated Bed Capacity at <u>Dec. 31, 1971</u>	% Increase or (Decrease) in Beds <u>1971/70</u>	Number Per 1,000 Eligible Population <sup>1</sup>			
			<u>1968</u>	<u>1969</u>	<u>1970</u>	<u>1971</u>
Public and Private Hospitals						
Active treatment .....	38,606	1.0	5.1	5.1	5.0	5.0
Psychiatric (short-term and intermediate) <sup>2</sup> ....	1,804	9.9	0.2	0.2	0.2	0.3
General rehabilitation .....	899	5.5	0.1	0.1	0.1	0.1
Special rehabilitation .....	287	0.3	.....	0.0	0.0	0.0
Chronic care <sup>3</sup> .....	8,020	1.0	1.1	1.1	1.1	1.1
All levels of care .....	49,616	1.4	6.5	6.5	6.4	6.5
Federal Hospitals and Nursing Stations						
All levels of care .....	1,276	0.8	0.2	0.2	0.2	0.2
TOTAL, all levels of care .....	50,892	1.4	6.7	6.7	6.6	6.7

The increase of 1.0 percent in active treatment beds was mainly due to completion of major construction projects at Joseph Brant Memorial, Burlington; Kitchener-Waterloo, Kitchener; and Women's College, Toronto. The increase in beds for chronic care was partially attributable to new units opening in Joseph Brant, Burlington; St. Joseph's General, Elliot Lake; and La Verendrye Hospital, Fort Frances. Beacon Hill, Ottawa was also added to those nursing homes with temporarily approved beds for chronic care. Footnote 12 to Table 1 on page lists all those public hospitals that had a change of ten or more beds during 1971.

The number of beds per 1,000 eligible population remained constant except for short-term and intermediate psychiatric care. An increase of 0.1 at this level of care resulted in 0.3 beds being available per 1,000 population at the end of the year.

<sup>1</sup> Eligible population is defined to be the total census population (7,703,000) excluding armed forces personnel and mental patients in Ontario Psychiatric Hospitals and Institutions for the Retarded (37,000).

<sup>2</sup> Includes 12 paediatric psychiatric beds in Hospital for Sick Children, Toronto.

<sup>3</sup> Includes temporarily approved nursing homes.

## Volume of Hospital Care

With the exception of special rehabilitation services, it can be seen in Part I of Table B below that patients under care and days of care increased at all levels in public and private hospitals. A decrease of 34 patients in special rehabilitation facilities resulted in a decrease of 1.6 percent from the previous year although days of care at this level increased by 4.4 percent. In Federal hospitals and nursing stations both patients and days decreased.

**TABLE B**

<sup>1</sup> Refers to Clarke Institute of Psychiatry, Toronto and The Donwood Institute, Toronto. Data for psychiatric units in public hospitals are included with active units as in previous years.

<sup>2</sup> See footnote 1 on page viii of this report.

Part II of Table B shows an increase in percentage of beds occupied in public and private hospitals for all but active treatment care. Active treatment care is the only area where an increase in admissions per 1,000 population occurred in 1971. While the average length of stay declined in 1971 to 11.7 days in public and private hospitals, a slight increase in the length of stay in Federal hospitals and nursing stations resulted in a smaller overall decrease from the previous year to 11.9 days stay in all hospitals in 1971.

Table C shows a slight decrease of 0.1 percent in the days of care per 1,000 population at the active treatment level with larger percentage decreases for psychiatric care and all levels of care in Federal hospitals and nursing stations. However the total days of care per thousand population for all levels of care remained unchanged from the previous year at 2,032 days in 1971.

TABLE C

	Days of Care Per 1,000 Eligible Population <sup>2</sup>				Percentage Increase or (Decrease)		
	1968	1969	1970	1971	1969/68	1970/69	1971/70
Public and Private Hospitals							
1. Active treatment .....	1,577	1,577	1,584	<b>1,582</b>	0.0	0.4	<b>(0.1)</b>
2. General rehabilitation .....	44	34	33	<b>35</b>	(2.7)	(2.9)	<b>6.1</b>
3. Chronic care .....	348	345	347	<b>349</b>	(0.9)	0.6	<b>0.6</b>
4. Psychiatric treatment <sup>1</sup> .....	9	11	11	<b>10</b>	22.2	0.0	<b>(9.1)</b>
5. Special rehabilitation services .....		11	12	<b>12</b>	....	9.1	<b>0.0</b>
All levels of care .....	1,978	1,978	1,987	<b>1,988</b>	0.0	0.5	<b>0.1</b>
Federal Hospitals and Nursing Stations							
All levels of care .....	50	46	45	<b>44</b>	(8.0)	(2.2)	<b>(2.2)</b>
TOTAL, all levels of care .....	2,028	2,024	2,032	<b>2,032</b>	(0.2)	0.4	<b>0.0</b>

In Table D it can be seen that newborn under care and their days of care reversed the trend of the two previous years and decreased by 2.8 percent and 4.8 percent respectively. In spite of a small increase of 1.4 percent in private hospitals the total newborn average length of stay decreased by 1.4 percent in 1971 to 6.9 days compared to 7.0 days in 1970 and 1969.

TABLE D

	Newborn Under Care			Newborn Days of Care			Average Length of Stay of Newborn		
	% Increase or (Decrease)			% Increase or (Decrease)			% Increase or (Decrease)		
Hospitals in Ontario	1970	1971		1970	1971		1970	1971	
1. Public .....	137,595	<b>133,850</b>	(2.7)	946,983	<b>902,305</b>	(4.7)	7.0	<b>6.9</b>	(1.4)

<sup>1</sup> Refers to Clarke Institute of Psychiatry, Toronto and The Donwood Institute, Toronto. Data for psychiatric units in public hospitals are included with active units as in previous years.

<sup>2</sup> See footnote 1 on page viii of this report.

The total days of care by type, provided in public general hospitals for the past three years, are shown in Table E. With the exception of obstetrical and paediatric days there was an increase in each of the other three major classifications in 1971. The days of care for all services last year reached 13,068,681 representing a 1.0 percent increase from the previous year.

TABLE E

Public Active, Psychiatric and Special Rehabilitation Hospitals and Units	Days by Type of Service			% Increase or (Decrease)

### DIAGNOSES OF PATIENTS SEPARATED FROM HOSPITALS

(See Tables 14 to 16)

The data for the morbidity and surgical procedure tables contained in this Supplement, are taken from the admission-discharge forms processed by the Commission during the year. Each admission-discharge form represents one continuous stay in hospital which was terminated by discharge, transfer or death. Thus the statistics represent the number of separations from hospitals rather than the number of individuals who received hospital care during the process year. The data have also been classified in terms of the Canadian Diagnostic List and correlated with the ICDA-8 Section Headings, to permit easy identification of diagnostic content.

Table F provides a summary of the ten highest ranking ICDA-8 Sections, by number of separations from active and rehabilitation hospitals. Comparison with the previous year shows a 3.2 percent increase in total separations for 1971 over 1970.

TABLE F

#### Active Treatment and Rehabilitation Hospitals

Rank 1971	ICDA-8 Sec.	Eighth Revision International Classification of Diseases, Adapted for Use In The United States	Number of Separations <sup>1</sup>		% Increase or (Decrease) 1971/70	% Distribution of Total Separations		Average Length of Stay

<sup>1</sup> Includes all adults and children separated from Active Treatment and Rehabilitation Hospitals whose admission-discharge forms were processed during the year 1971.

Table F-1 sets out the ten most common Canadian Diagnostic List classifications by number of separations and Table F-2 identifies the ten most common classifications by number of days accruing to separations from active and rehabilitation hospitals.

In Table F-1, approximately 73 percent of the separations classified to Canadian List No. 170 are attributed to "abdominal pain", "uremia", "convulsions", "pain referable to the urinary system", "pain in chest", "incontinence of urine", "epistaxis", "pyrexia of unknown origin", "hematuria" and "syncope". Special conditions and examinations without sickness (No. 186) includes 22,670 admissions for sterilization.

TABLE F-1

Active and Rehabilitation Hospitals, Ranking by Number of Separations

Active and Rehabilitation Hospitals, Ranking by Days of Care of Separations  
Identified by Canadian List Number

Rank	Canadian List Number	Classification	Days of Care		% Increase or (Decrease) 1971/70	% Distribution of Total Days		Average Length of Stay	
			1970	1971		1970	1971	1970	1971
1.	141	Delivery without mention of complication .....	705,750	669,635	(5.1)	5.6	5.3	6.2	6.2
2.	80	Other ischemic heart disease .....	470,035	488,858	4.0	3.7	3.9	16.7	15.9
3.	79	Acute myocardial infarction .....	396,534	391,730	(1.2)	3.2	3.1	21.5	20.8
4.	56	Neuroses .....	383,183	343,519	(10.4)	3.0	2.8	16.9	16.6
5.	118	Cholelithiasis .....	314,094	324,405	3.3	2.5	2.6	13.5	12.9
6.	174	Fracture of femur .....	293,839	319,487	8.7	2.4	2.6	38.6	36.9
7.	170	Symptoms, senility and ill-defined conditions .....	194,852	272,015	39.6	1.6	2.2	6.2	6.0
8.	94	Pneumonia .....	341,203	265,464	(22.2)	2.7	2.1	11.8	11.1
9.	84	Other cerebrovascular disease .....	248,421	257,609	3.7	2.0	2.0	22.5	22.1
10.	81	Other forms of heart disease .....	212,784	248,079	16.6	1.7	2.0	15.8	15.6

Table F-3 sets out the six most common Canadian Diagnostic List classifications by days of care recorded for separations from chronic care facilities which include hospitals, units and approved nursing homes.

TABLE F-3

Chronic Care Facilities, Ranking by Days of Care for Separations  
Identified by Canadian List Number

Canadian			Days of		% Increase	% Distribution of		Average Length	
Rank	List		Care		or(Decrease)	Total Days		of Stay	
1971	Number	Classification	1970	1971	1971/70	1970	1971	1970	1971
1.	84	Other cerebrovascular disease .....	466,691	473,655	1.5	17.3	16.4	245.6	249.4
2.	80	Other ischemic heart disease .....	275,357	304,569	10.6	10.2	10.6	241.1	246.8
3.	66	Other diseases of central nervous system .....	173,886	241,792	39.1	6.4	8.4	354.1	433.3
4.	174	Fracture of femur .....	216,419	199,314	(7.9)	8.0	6.9	175.0	160.2
5.	63	Multiple sclerosis .....	129,337	126,562	(2.1)	4.8	4.4	607.2	626.5
6.	85	Arteriosclerosis .....	122,154	119,860	(1.9)	4.5	4.2	332.8	328.4

Table 14 provides detail for each Canadian Diagnostic List classification showing (1) total separations, (2) the percent relationship each classification bears to total active and rehabilitation separations, (3) the rate per 1,000 population for each classification and (4) the same information for days of care accruing to the separations in each classification. Table 15 summarizes by ICDA-8 section heading the five highest ranking groups of separations from chronic hospitals with detail provided as in Table 14. Table 16 (Sections A and B) summarizes the leading causes of deaths for separations from active and rehabilitation hospitals (16A) and from hospitals for chronic care (16B).

The Canadian Diagnostic List classification with the longest average length of stay for active and rehabilitation hospitals is number 174, fracture of femur, which shows 8,655 separations, 319,487 days of care, 1.1 separations per 1,000 population and 41.7 days of care per 1,000 population. The shortest average length of stay is number 104, diseases of teeth and supporting structures, which records 20,246 separations, 38,071 days of care, 2.6 separations per 1,000 population and 5.0 days of care per 1,000 population.

## Special Services Provided by Hospitals

### Laboratory (Table 4)

Commencing in 1969 hospitals based their evaluation of laboratory procedures on the 1969 edition of the Schedule of Unit Values for Clinical Laboratory Procedures which is published by Statistics Canada. Owing to the late introduction of the completely new Schedule some hospitals experienced serious difficulties in 1969 in providing data for the whole year based on the new Schedule. Consequently, Table G shows a comparison of the volume of laboratory services for two years only.

**TABLE G**

	Volume of Laboratory Services		% Increase or (Decrease)
	<u>1970</u>	<u>1971</u>	<u>1971/70</u>
Public General Hospitals <sup>1</sup>			
In-Patients

Units per In-Patient <sup>2</sup>	262.3	<b>260.4</b>	<b>(0.7)</b>
Units per In-Patient Day <sup>2</sup>	27.2	<b>27.8</b>	<b>2.2</b>
Out-Patients	65,652,100	<b>73,095,705</b>	<b>11.3</b>
Units for Routine Health <sup>3</sup>	57,991,058	<b>68,153,633</b>	<b>17.5</b>
Units Referred-in	17,935,799	<b>18,970,439</b>	<b>5.8</b>
TOTAL work done in hospitals	467,047,858	<b>495,263,450</b>	<b>6.0</b>
Public General Rehabilitation, Chronic and Special Rehabilitation Hospitals			
In-Patients			
Total Units of Work ....	2,527,601	<b>2,519,434</b>	<b>(0.3)</b>
Units per In-Patient <sup>2</sup>	215.6	<b>198.5</b>	<b>(7.9)</b>
Units per In-Patient Day <sup>2</sup>	2.1	<b>1.9</b>	<b>(9.5)</b>
Out-Patients	22,944	<b>33,084</b>	<b>44.2</b>
Units for Routine Health <sup>3</sup>	331,009	<b>343,494</b>	<b>3.8</b>
Units Referred-in			
TOTAL work done in hospitals	2,881,554	<b>2,896,012</b>	<b>0.5</b>
GRAND TOTALS — All Public Hospitals .....	469,929,412	<b>498,159,462</b>	<b>6.0</b>

<sup>1</sup> Includes Clarke Institute of Psychiatry, Toronto and The Donwood Institute, Toronto.

<sup>2</sup> Hospitals that did not report laboratory units of work were excluded from the calculation.

<sup>3</sup> Routine health examinations include staff, environmental, quality control, calibration standards and research.

## Radiology (Tables 5 and 6)

Although the total number of radiological examinations given in public general hospitals continues to increase each year it has been at a diminishing rate for the past two years. Table H shows that the 4,149,374 examinations given in 1971 were 6.0 percent more than those given in 1970. It can also be seen that a larger increase occurred in out-patient examinations than in those for in-patients.

The Princess Margaret Hospital and seven clinics attached to public general hospitals in regional centres of the Province continued to be staffed and operated by the Ontario Cancer Institute. Table 6 on page 44 omits data on any treatments for public hospital patients since the reporting form used by these hospitals does not provide for reporting the number of patients receiving therapy, as do the ones for the facilities operated by the Ontario Cancer Institute.

TABLE H

				% Increase or (Decrease)	
	<u>1969</u>	<u>1970</u>	<u>1971</u>	<u>1970/69</u>	<u>1971/1970</u>

## Staffing of Hospitals and Nursing Homes Temporarily Approved for Chronic Care

(See Tables 7, 11, 12 and 13)

In Table J can be seen the percentage increase or decrease in rated or approved beds as well as the number of full-time and part-time employees on staff December 31, 1971, in public, private and Federal hospitals, and in nursing homes temporarily approved for chronic care. Private hospitals were the only classification to have a decrease in beds in 1971 but this was not sufficient to prevent an overall increase in beds of 1.4 percent at year end. It was also only in private hospitals where any decrease occurred in the number of employees on staff at the end of 1971 compared to the previous year.

TABLE J

	Rated Beds % Increase or (Decrease) <u>1971/70</u>	Employees on Staff as at December 31st					
		Full-time			Part-time		
		<u>1970</u>	<u>1971</u>	<u>% Increase or (Decrease)</u>	<u>1970</u>	<u>1971</u>	<u>% Increase or (Decrease)</u>

TOTALS .....	1.4	98,004	100,483	2.5	18,064	19,013	5.3

### Formal Training Programmes in Public Hospitals (Table 8)

Table K following condenses the more detailed data shown in Table 8. These data concern training programmes in those hospitals approved under the Plan and in special schools of nursing.

Although the number of nurse enrollees were fewer at the end of 1971 than the previous year there was an unusual increase in the number graduating in 1971. This is largely attributable to the fact that twenty-seven schools conducting the "two-plus-one" programme were given approval to delete the internship year and conduct a straight two-year course. Consequently several schools had students graduating from both types of courses in 1971.

There was a slight decrease in the number of radiological technicians and nursing assistants enrolled at the end of the year in public general hospital courses but a slight increase in the number of nursing assistants enrolled in chronic hospitals. However the number graduated in 1971 increased in each of the allied health fields compared to 1970.

<sup>1</sup> Includes beds and staff of general rehabilitation, chronic and special rehabilitation units attached to public general hospitals.

<sup>2</sup> Includes beds and staff of general rehabilitation units in chronic hospitals and chronic units in general rehabilitation hospitals.

<sup>3</sup> Refers to Clarke Institute of Psychiatry and The Donwood Institute.

TABLE K

Courses offered	Number of Hospitals or Schools	Enrollment at December 31			Number that Graduated		
		1970	1971	% Increase or (Decrease)	1970	1971	% Increase or (Decrease)
Public General Hospitals							
Nurses .....	40	6,131	<b>5,146</b>	(16.1)	2,225	<b>2,954</b>	32.8
Radiological Technicians .....	66	528	<b>501</b>	(5.1)	232	<b>241</b>	3.9

Nursing Assistants .....	2	80	<b>82</b>	2.5	89	<b>108</b>	21.3
Special Schools of Nursing ....	23	4,062	<b>3,918</b>	(3.6)	691	<b>1,691</b>	144.7

### C. FINANCIAL DATA (Tables 17 to 22)

The hospital operating expenses shown in the financial tables (17 to 22) were derived from Part II of the Annual Return (HS-2) of public hospitals and their year-end settlement forms (HF series).

During 1971 the total financial responsibility of the Commission amounted to \$884,588,316. The distribution for 1971 as compared to 1970 and 1969 can be seen in Table L.

TABLE L

	1969	1970	1971	% Increase or (Decrease)	
				1970/69	1971/70
Public Hospitals in Ontario .....	\$609,420,275	\$682,982,134	<b>\$785,920,674</b>	12.1	<b>15.1</b>
Hospitals outside Ontario .....	8,309,508	7,282,649	<b>8,720,372</b>	(12.4)	<b>19.7</b>
Federal Government Hospitals .....	6,055,795	6,649,373	<b>7,793,718</b>	9.8	<b>17.2</b>
Privately Owned Hospitals including Nursing Homes .....	10,758,666	9,321,948	<b>10,295,943</b>	(13.4)	<b>10.4</b>
Out-patient services for emergency care .....	29,741,435	38,993,600	<b>57,093,832</b>	31.1	<b>46.4</b>
Ambulance and other non-sharable costs .....	12,439,687	15,960,687	<b>21,426,164</b>	28.3	<b>34.2</b>
Recoveries from other insurers .....	(5,121,979)	(5,438,765)	<b>(6,662,387)</b>	6.2	<b>22.5</b>
<b>TOTAL .....</b>	<b>\$671,603,387</b>	<b>\$755,751,626</b>	<b>\$884,588,316</b>	<b>12.5</b>	<b>17.0</b>

The total financial responsibility of the Commission shown in Table L is exclusive of the net administrative costs of the Plan. In 1971 administrative expenses amounted to \$6,475,767 and represented 0.7 percent of the overall cost, a decrease of 0.1 percent from 1970.

### D. SURGICAL OPERATIONS (Table 23)

Table 23 provides detail on selected surgical operations within the ICDA-8 classification and was set up to reflect the organization of surgical specialties in hospitals. For every 1,000 population, 75.4 operations were performed. The rate for tonsillectomies and adenoidectomies (codes 21.1, 21.2 and 21.3) is 8.1/1,000 total population and for dilation and curettage of the uterus (codes 70.3, 74.7 and 78.1) is 13.6/1,000 female population. Other leading rates are recorded for repair of hernias (codes 38.0, 38.2, 38.3, 38.6 and 38.8) at 3.4/1,000 total population, for cholecystectomy at 3.4/1,000 total population and for ligation and division of fallopian tubes at 5.3/1,000 female population.

TABLE M

(1) Includes McCausland Hospital, Terrace Bay, which became a public general hospital March 17, 1971.

(2) New units for general rehabilitation were opened at Kitchener-Waterloo Hospital, Kitchener, December 6, 1971; Oakville-Trafalgar Memorial Hospital, Oakville, May 10, 1971.

(3) New units for the chronically-ill were opened at Joseph Brant Memorial Hospital, Burlington, March 1, 1971; St. Joseph's General Hospital, Elliot Lake, July 28, 1971; La Verendrye Hospital, Fort Frances, November 15, 1971.

(4) Bethesda Hospital, London, closed December 31, 1971. The McCausland Hospital, formerly known as Terrace Bay Hospital, became a public general hospital, March 17, 1971 now named The McCausland Hospital Terrace Bay, Terrace Bay.

(5) Hartington Private Hospital, Ottawa, ceased as a private hospital September 30, 1971; The Villa Private Hospital, Thornhill, increased licensed beds from 32 to 41.

(6) Includes nursing stations at Fort Hope and Kashechewan which opened in 1971 with 4 beds each. Statistical data are not available for nursing station at Kashechewan.

(7) The approved beds in La-Pointe Fisher Nursing Home increased from 18 to 25. One additional nursing home approved under the Plan.

# TRENDS IN PUBLIC HOSPITAL CARE, 1969 to 1971

Total Paid Hours of Work .....	206,856,135	201,972,104	195,576,059	2.4	3.3

\* Insured population as of December 31st.

- (1) Discharges and deaths plus patients in-residence at end of year.
- (2) Days since admission (i.e., include some days from prior year(s) but excludes days of patients in-residence at end of year).
- (3) Days of care given during calendar year to discharges and deaths and patients in-residence at end of year.
- (4) Refers to Clarke Institute and Donwood Institute only. Days for psychiatric units of public hospitals are included with active units as in previous years.
- (5) Excludes general rehabilitation, chronic and special rehabilitation hospitals.
- (6) Laboratory services based on the new schedule of unit values for clinical procedures introduced in 1969. As some hospitals experienced problems in adjusting to the new schedule, no reliable figures are available for 1969.
- (7) Excludes screening chest x-ray examinations.

\* Turnover interval measures the average length of time that a bed remains empty.

(1) Includes isolation beds and beds used by patients requiring long-term care in hospitals that do not have officially recognized general rehabilitation or chronic units. Also included are beds in specific areas set aside for medical and surgical specialties such as orthopaedics, cardiology, neurosurgery, urology, gynaecology, ophthalmology, renal dialysis and intensive care, as well as dentition beds in hospitals which do not have officially recognized psychiatric units. Since intensive care beds are included in total Medical-Surgical only, the beds in this column may be greater than Medical plus Surgical beds.

(2) In many smaller hospitals, principally those under 75 beds, "paediatric" beds are drawn from the medical-surgical service as required; consequently, the patient-day figures shown on Table 3 are more indicative of the utilization in this area, than the bed figures reported by the hospitals. For the Red Cross Outpost, or Group D Hospitals, the same comment also applies to obstetrical beds.

(3) For individual hospitals, percentage occupancies based on rated beds were calculated on the number of rated beds available throughout the year, and not on the final bed capacity shown. Thus any hospital reporting a change in their rated bed capacity had its occupancy calculated on the number of rated beds before and after the increase(s) or decrease(s). See footnote 12 for those hospitals which had significant changes in the number of rated beds. In calculating percentage occupancies for all groups of hospitals, the total rated beds as at December 31, 1971 were used.

(4) All percentages in these columns were based on the number of beds as of December 31, 1971. See Table 2.

(5) Hamilton -- The Hamilton Civic Hospitals include Hamilton General Hospital and Henderson General Hospital.

(1) Newborn admissions do not necessarily equal the livebirths in hospital, since admissions include any newborn born on the way to the hospital.

(2) Hamilton, The Hamilton Civic Hospitals include Hamilton General Hospital and Henderson General Hospital.

(3) The data for Brampton, Peel Memorial Hospital include patients temporarily accommodated in Tullamore Nursing Home.

(4) Belleville, Belleville General Hospital Queen's Self Care Unit data included with Active for group totals.

(5) Oakville, Oakville-Trafalgar Memorial Hospital include patients temporarily accommodated in General Rehabilitation Unit in Extendicare Nursing Home.

(6) Halleybury, Temiskaming Hospital formerly known as Misericordia Hospital.

(7) Terrace Bay, McCausland Hospital Terrace Bay became a public general hospital effective March 17, 1971.

(8) London, London Health Association (Rheumatic and Arthritic Disease Unit) temporarily located at Westminster Hospital until University Hospital, London, completed.

(9) This hospital had an increase or decrease in its rated bed capacity of 10 or more beds during the calendar year ending December 31, 1971. Details regarding the nature of the change appear in footnote 12 of Table 1.

(10) The average number in hospital daily in Table 2 does not necessarily agree with Table M because the figures in Table 2 have been weighted.

(1) Since Intensive Care days are included in total Medical-Surgical only, the days in this column may be greater than Medical plus Surgical days.

(2) For the smaller hospitals, principally those under 75 beds, the patient day figures shown for the "paediatric service" are more indicative of the utilization in this area, than the bed figures reported by the hospital, which are shown in Table 1, since these hospitals usually draw their "paediatric" beds from the medical-surgical services as required. The same comment also applies to the obstetrical days shown for Red Cross Outpost (or Group D) hospitals.

(3) Hamilton -- The Hamilton Civic Hospitals include Hamilton General Hospital and Henderson General Hospital.

(4) Kitchener, Kitchener-Waterloo Hospital - unit for general rehabilitation opened December 6, 1971.

(5) Burlington, Joseph Brant Memorial Hospital - unit for chronically-ill opened March 1, 1971.

(6) The data for Brampton, Peel Memorial Hospital include patients temporarily accommodated in Tallmore Nursing Home.

(7) Belleville, Belleville General Hospital Queen's Self Care unit data included with active for group totals.

(8) The data for Oakville, Oakville-Trafalgar Memorial Hospital include beds and patients temporarily accommodated in general rehabilitation unit in Extendicare Nursing Home.

(9) Halesbury, Temiskaming Hospital formerly known as Misericordia Hospital.

(10) Elliot Lake, St. Joseph's General Hospital - unit for chronically-ill opened July 28, 1971.

(11) Port Frances, La Verendrye Hospital - unit for chronically-ill opened November 15, 1971.

(12) Terrace Bay, The McCausland Hospital Terrace Bay became a public general hospital effective March 17, 1971.

(13) London, London Health Association (Rheumatic and Arthritic Disease Unit) temporarily located at Westminster Hospital until University Hospital, London, completed.

(14) This hospital had an increase or decrease in its stated bed capacity of 10 or more beds during the calendar year ending December 31, 1971. Details regarding the nature of the change appear in footnote 12 of Table 1.

Ø Hospital has a general rehabilitation unit, see footnote 1 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

⊕ Hospital has a special rehabilitation unit, see footnote 1 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

# Hospital has a chronic unit, see footnote 1 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

(1) As the amount of laboratory service performed on behalf of patients in general rehabilitation, special rehabilitation and/or chronic units attached to public general hospitals is believed to be relatively negligible, a lesser distortion seemed assured in these calculations by using only active treatment patients and days in the divisions for hospitals in Groups A to D. In calculating group totals, hospitals that did not report laboratory units were deleted.

(2) Includes registered and non-registered technologists.

(3) In calculating group totals hospitals that did not report laboratory units and/or hours of work were deleted.

(4) As hospitals often find it difficult to obtain unit values from outside laboratories some of the figures in these three columns may be estimates.

(5) Hamilton -- The Hamilton Civic Hospitals include Hamilton General Hospital and Henderson General Hospital.

(6) Halleybury, Tenksham Hospital formerly known as Miseriordia Hospital.

(7) Terrace Bay, The McCausland Hospital Terrace Bay became a public general hospital March 17, 1971.

(8) Hospital operates an approved course for training laboratory technologists. See Table 8 for particulars about numbers enrolled and totals graduated.

Ø Hospital has a special rehabilitation unit, see footnote 2 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.  
 Ø Hospital has a special rehabilitation unit, see footnote 2 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.  
 # Hospital has a chronic unit, see footnote 2 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

- (1) Combines in-patients and out-patients.
- (2) As the amount of diagnostic radiology service performed on behalf of patients in general rehabilitation, special rehabilitation and/or chronic units attached to public general hospitals is believed to be relatively negligible, a lesser distortion seemed assured in these calculations by using only active treatment patients and days in the divisor for hospitals in Groups A to D. In calculating group totals, hospitals that did not report radiographic examinations were deleted.
- (3) Includes registered and non-registered technicians. Hours relating to both diagnostic and therapeutic technicians have been used in this calculation as no breakdown is available.
- (4) In calculating group totals hospitals that did not report radiographic examinations and/or hours of work were deleted.
- (5) Hamilton -- The Hamilton Civic Hospitals include Hamilton General Hospital and Henderson General Hospital.
- (6) Halleybury, Teeslaking Hospital formerly known as Misericordia Hospital.
- (7) Terrace Bay, The McLaughlin Hospital Terrace Bay became a public general hospital March 17, 1971.
- (8) Hospital operates an approved course for training radiological technicians. See Table 8 for particulars about numbers enrolled and totals graduated.

Willowdale	York Regional School of Nursing											
	Total--Special Schools						3,918 (6)					1,691 (6)

(1) Includes beds in General Rehabilitation, Chronic and Special Rehabilitation Units.

(2) Includes "affiliates-out" but not "affiliates-in".

(3) The courses for Radiological Technicians are approved separately or jointly by the Canadian Medical Association of Radiologists, Canadian Society of Radiological Technicians and The Ontario Society of Radiographers.

(4) Princess Margaret Hospital provides for the training of radiography technicians.

(5) Formerly known as Sudbury Regional School of Nursing.

(6) The phasing out of the two-plus programs into the two-year programs at some schools has resulted in a decrease in the number of students in training at December 31, 1971 and an increase in the number of graduations during the year.

Ø Hospital has a general rehabilitation unit, see footnote 3 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.  
 Ø Hospital has a special rehabilitation unit, see footnote 3 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.  
 # Hospital has a chronic unit, see footnote 3 below. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

- (1) Paid hours of work per diem are based on total hours of persons employed in active, general rehabilitation, special rehabilitation and chronic units and corresponding total adult and child days plus 1/4 newborn days. Due to rounding, this figure may not always equal the sum of the per diem rates by department.
- (2) Nursing services are reported in total because of a lack of detailed uniform information about individual nursing units.
- (3) Per diem for hospitals with general rehabilitation, special rehabilitation and/or chronic units are somewhat understated due to inclusion of general rehabilitation, special rehabilitation and chronic days in division, however, the amount of laboratory and radiology service given to these classes of patients is relatively negligible.
- (4) Other special services include services such as organized out-patient services, mental health, radioisotope services, pharmacy, physical medicine and rehabilitation, social service, ambulance and motor service.
- (5) Other education includes hours relating to medical education (but not residents and interns) and non-classroom hours of staff and students engaged in other training programmes such as laboratory, radiology, administration, dietary and physical medicine.
- (6) Paid hours of work relating to non-allowable operating costs include special research projects, office of the medical staff, ancillary operations and other special departments.
- (7) Hamilton - The Hamilton Civic Hospitals include Hamilton General Hospital and Henderson General Hospital.
- (8) Hallogbury, Temiskaming Hospital formerly known as Misericordia Hospital.
- (9) Terrace Bay, The Misericordia Hospital formerly known as Misericordia Hospital.
- (10) This hospital had an increase or decrease in its rated bed capacity of 10 or more beds during the calendar year ending December 31, 1971. Details regarding the change appear in footnote (12) to Table 1.

(1) Unless otherwise noted, rated bed capacity refers to active, general rehabilitation and/or chronic beds. Not shown are beds in Department of Veterans Affairs hospitals assigned to accommodate committed mental patients and domiciliary patients.

(2) Generally, percentage occupancies are based on rated active and chronic beds as of December 31, 1971 but in the case of Ottawa, Rideau Veterans Home domiciliary beds have been included.

(3) Total days stay since admission for discharges and deaths.

(4) Fort Hope Nursing Station opened March, 1971.

(5) Kashechewan Nursing Station opened during 1971 but no statistics available.

(6) All personnel figures include those persons employed in the long-term mental, domiciliary and tuberculosis units.

(7) Ottawa, Rideau Veterans Home - statistics include figures relating to domiciliary care.

SOURCE: Admission-Discharge Forms processed between January 1st and December 31st 1971.

- (1) These statistics include:
- (a) All Ontario residents hospitalised in public and private hospitals in Ontario;
  - (b) Insured Ontario residents hospitalised in out-of-province hospitals;
  - (c) Out-of-province residents hospitalised in public and private hospitals in Ontario;
  - (d) Patients hospitalised in Federal hospitals for whom O.H.S.C. was responsible.
- (2) A Canadian List of 188 diagnoses selected as a basis for study by provincial hospital insurance programmes.
- (3) Eighth Revision International Classification of Diseases, Adapted for use in the United States.
- (4) Includes all patients who were discharged from or died in hospital.
- (5) Includes days of care accrued to all patients who were discharged from or died in hospital.
- (6) Eligible population is defined to be the total Census population (7,703,000) excluding armed forces personnel and mental patients in Ontario Psychiatric Hospitals, and institutions for the Retarded (37,000).
- (7) Due to rounding of decimal places, the percentages for the individual categories in this section do not add to the section total.
- (8) Newborn definition was changed in 1964 and consequently, all newborn are now excluded from these statistics.
- (9) In 1971, the I10 Medical and Surgical Aftercare codes were reserved for classifying separations from Active Treatment Hospitals only. Separations from General and Special Rehabilitation Hospitals were classified by specific morbidity codes.
- \* Indicates less than 0.1%

SOURCE: Admission-Discharge Forms processed between January 1st and December 31st 1971.

- (1) These statistics include: (a) All Ontario residents hospitalized in public and private hospitals in Ontario; (b) Inured Ontario residents hospitalized in out-of-province hospitals; (c) Out-of-province residents hospitalized in federal hospitals for whom O.H.S.C. was responsible; (d) Patients hospitalized in federal hospitals for whom O.H.S.C. was responsible.
- (2) Only those individual Canadian List Numbers which are 1.0% or greater of total separations are shown (See Table 14 for ICDA-8 numbers corresponding to Canadian List Numbers).
- (3) Includes all patients whose day of care occurred in the calendar year 1971.
- (4) Includes day of care occurring in the calendar year 1971.
- (5) Eligible population is defined to be the total Census population (7,793,000) excluding armed forces personnel and mental patients in Ontario Psychiatric Hospitals and Institutions for the Retarded (37,000).
- (6) Due to rounding of decimal places, the percentages for the individual categories in this section do not add to the section total.
- \* Indicates less than 0.1%.

\* Reflects melding of active and chronic rates into one "per diem" figure.

\*\* In addition there is an approved general rehabilitation rate equivalent to the chronic rate.

\*\*\* In addition there is an approved self-care rate of \$25.00.

(1) Includes operating costs for Chronic Unit.

(2) Includes operating costs for General Rehabilitation Unit.

(A) Toronto, New Mount Sinai - The Nightingale School of Nursing is included.

(B) Toronto, Queensway General - The Quo Vadis School of Nursing is included.

(C) Base hospitals whose costs include expenditures for Regional Schools of Nursing.

(D) Toronto, The Princess Margaret - a significant portion of expenditures relate to research.

(E) Hamilton, McMaster University Medical Centre - operates on an Out-Patient basis only.

(F) Ottawa, Royal Ottawa - operates on an Out-Patient basis only.

(G) Toronto, Alcoholism and Drug Addiction Research Foundation (Clinical Institute) - figures are for the period beginning April 1, 1971. A significant portion of expenditures relate to research.

(H) The figures for these hospitals are prepared from the December Operating Statements.

(I) The general rehabilitation patient days for these hospitals are for special rehabilitation patients for whom the active standard ward rate applies.

(J) For these hospitals the patient days reported on Form HF-50 have been used. These patient days do not agree with those reported on Form HS-1.

(K) Windsor, I.O.D.E. Memorial - includes Adult Psychiatric Unit from April 1, 1971.

In some instances approved net allowable costs may vary somewhat from the above because a number of submissions had not been reviewed by the Commission at time of going to press.

Table 18—Distribution of Operating Costs of Public Hospitals on a Per Diem Basis

Location	Hospitals by Bed Size	Total Adult and Child Days During Year	Gross Operating Costs	Salaries and Wages including Allowable Med. Staff Remuneration	Medical and Surgical Supplies	Drugs	Administration	FOOD			Laundry and Linen	House-keeping	Plant Operation	Plant Maintenance	Shareable Equipment	Depreciation on Building and Interest	Other (Allowable)	Other (Non-Allowable)				
								Gross Cost	Net Cost	Food Cost

\* Does not represent depreciation, but the purchase of furniture and equipment on an outright basis.

(1) Includes operating costs for Chronic Unit.

(2) Includes operating costs for General Rehabilitation Unit.

(3) The salary and wages percentage of gross operating cost is 68.77.

(A) Toronto, New Mount Sinai - The Nightingale School of Nursing is included.

(B) Toronto, Queensway General - The Quo Vadis School of Nursing is included.

(C) Base hospitals whose costs include expenditures for Regional Schools of Nursing.

(D) Toronto, The Princess Margaret - a significant portion of expenditures relate to research.

(E) Hamilton, McMaster University Medical Centre - operates on an Out-Patient Basis only.

(F) Ottawa, Royal Ottawa - operates on an Out-Patient Basis only.

(G) Toronto, Alcoholism and Drug Addiction Research Foundation (Clinical Institute) - figures are for the period beginning April 1, 1971. A significant portion of expenditures relate to research.

(H) The figures for these hospitals are prepared from the December Operating Statements.

(I) For this hospital the patient days reported on Form HP-50 have been used. These patient days do not agree with those reported on Form HS-1.

(J) Windsor, I.O.D.E. Memorial - includes Adult Psychiatric Unit from April 1, 1971.

In some instances distribution of operating costs may vary somewhat from the above because a number of submissions had not been reviewed by the Commission at time of going to press.

In some instances distribution of departmental "per diem" rates may not add up to gross operating costs "per diem", due to rounding.

Table 19—Departmental Distribution of Gross Operating Costs on a Per Diem Basis

Hospital	Grand Total Beds	Total Adult and Child Days	Gross Operating Costs	Nursing Services	Labo-ry Incl-ud-ing E.C.G., X-Ray, etc.	Radio-logy	Other Special Services	General Admin-istration	Laundry and House-keeping	Opera-tion and Main-tenance	Medi-cal Educa-tion	Nursing Educa-tion	Other Educa-tion	Allow-able Medical and Surgical Supplies	Share-able Depreci-ation	Bad Debts	(A) Other

\* Excludes special services which are non-allowable.

(1) Includes days, salaries and wages for Chronic Unit.

(2) Includes days, salaries and wages for General Rehabilitation Unit.

(A) Toronto, New Mount Sinai - The Nightingale School of Nursing is included.

(B) Toronto, Queensway General - The Quo Vadis School of Nursing is included.

(C) Base hospitals whose costs include expenditures for Regional Schools of Nursing.

(D) Toronto, The Princess Margaret - a significant portion of expenditures relate to research.

(E) Hamilton, McMaster University Medical Centre - operates on an Out-Patient basis only.

(F) Ottawa, Royal Ottawa - operates on an Out-Patient basis only.

(G) Toronto, Alcoholism and Drug Addiction Research Foundation (Clinical Institute) - figures are for the period beginning April 1, 1971. A significant portion of expenditures relate to research.

(H) The figures for these hospitals have been prepared from the December Operating Statements.

(I) The hospital laboratory and the provincial laboratory for the area operate as one therefore the costs of the provincial laboratory have been included.

(J) For this hospital the patient days reported on Form HF-50 have been used. These patient days do not agree with those reported on Form HS-1.

(K) Windsor, I.O.H.E. Memorial - includes Adult Psychiatric Unit from April 1, 1971.

In some instances distribution of departmental "per diem" rates may not add up to total salaries and wages "per diem", due to rounding.

SOURCE: Admission-Discharge Forms processed between January 1st and December 31st 1971.

(1) Only in-patient separations for which a surgical operation is recorded are included.

(2) Sub categories may not add due to rounding

\* Denotes less than 0.1%

Table 14 footnotes (1), (3), (6) and (8) provide additional information.

Statistical pick-up is limited to one operation per separation.

## HOW TO USE THE INDEX

The following index has been designed to help the user of this Supplement find information about individual public hospitals quickly and easily. The stub of the index, lists the public hospitals alphabetically in order of location, while the columnar headings identify the number and contents of each table where specific information about a particular hospital can be found. The numbers appearing in the body of the table (with the exception of the first two columns) indicate the pages within the Supplement on which information about the public hospitals mentioned can be found.

The quickest way to find a particular item of information about a specific hospital is to look first in the index for its location, name and **bed size**, and then for the table description and Supplement page number. Turn to the appropriate page number within the Supplement and look down the **rated bed column**, which is arranged in descending order by size, until you spot the number of beds (and the hospital) you wish to find. The relevant information you wish to have will be contained on the same row.

**NOTE:** Readers of this Supplement are cautioned that valid comparisons can only be made with a thorough knowledge of the various number and types of administrative and other practices occurring within individual hospitals which are reflected in the data presented herein. Operating costs vary widely from hospital to hospital and are dependent upon a number of factors such as composition and layout of plant facilities, number and qualifications of staff, types of treatment given, percentage of beds occupied, the operation of a School of Nursing or other training programmes and the volume of out-patient services offered.
